5 Minotticucine

"We live in a world surrounded by noise and chaos, leading us to seek the sanctuary of visual silence in our homes, allowing our thoughts to flourish and our soul to thrive," says showroom manager Achala Knights. "Our kitchens aim to create this atmosphere of calm through a process of rigorous simplification. All outward distractions, such as handles, plinths and appliances, are either eliminated or hidden in order to create a timeless feel."

Minotticucine is able to manufacture stone cabinet fronts up to 2.7m high. In addition, Terra mode – designed by award-winning architect Claudio Silvestrin – is manufactured in solid cast bronze. "We work closely with architects and interior designers to ensure that our design works in the space as a whole and not just the kitchen area," Knight says. "All our drawings are done on CAD, so that they can be imported into an architect/designer's drawings seamlessly." minotticucinelondon.com
